≣ Description   Edit

Precondition:

1. User is logged in to Jenkins.
2. An Organization folder is created.
3. User is on the main page.

Steps:

1. Click on the "+ New Item" button.
2. Type the Organization folder's NEW name into the input field "Enter an item name."
3. Type a job name different from the created Organization folder's name into the input field with the placeholder "Type to autocomplete" under the message "If you want to create a new item from other existing, you can use this option."
4. Click "OK" button

Expected results:

1. The user is redirected to a new page with the title "Error" and a message stating "No such job: {The name of the cloning job}."
